

United States of America  
Department of Transportation — Federal Aviation Administration  
**Supplemental Type Certificate**

*Number* SA5926NM

*This certificate, issued to* Electronics International, Inc.

*certifies that the change in the type design for the following product with the limitations and conditions therefor as specified hereon meets the airworthiness requirements of Part \* of the \* Regulations.*

*Original Product — Type Certificate Number:* \* See attached FAA Approved Model List (AML)  
*Make:* \* No. SA5926NM for list of approved airplane  
*Model:* \* models and applicable regulations.

*Description of Type Design Change:* Electronics International manifold pressure instrument manufactured and installed in accordance with the drawings and installation instructions specified on the FAA Approved Model List (AML) of this STC, or later FAA approved revisions.

*Limitations and Conditions:* Approval of this change in type design applies to the above model aircraft only. This approval should not be extended to other aircraft of this model on which other previously approved modifications are incorporated unless it is determined that the relationship between this change and any of those other previously approved modifications, including changes in type design, will introduce no adverse effect upon the airworthiness of that aircraft. A copy of this certificate and FAA Approved Model List (AML) No. SA5926NM, dated February 17, 1993, or later FAA approved revision, must be maintained as part of the permanent records for the modified aircraft.

*This certificate and the supporting data which is the basis for approval shall remain in effect until surrendered, suspended, revoked, or a termination date is otherwise established by the Administrator of the Federal Aviation Administration.*

*Date of application:* November 10, 1993 *Location:*

**Note 1:** Electronics International Instrument Model Designation System

M-1 ( ) - ( )

\_\_\_\_\_ A combination of letters and numbers defining the green, yellow and red Manifold Pressure Arcs that the analog portion of the instrument was programmed to.

\_\_\_\_\_ A Letter here indicates any major changes in the hardware and/or software of the instrument.

\_\_\_\_\_ Indicates the base model number of the instrument.

Example: M-1-G100Y190G200R295 indicates the following markings and calibration: A green arc from 10.0 to 18.9 "Hg., a yellow arc from 19.0 to 19.9 "Hg., a green arc from 20.0 to 29.4 " Hg. and red from 29.5 "Hg. on up. Arc information is for reference only.
